

Elementary & Middle School:

Monday

MS Scrapbooking

Staci Desatnick

Through scrapbooking and other related art projects, students will have the opportunity to build social skills and increase self-esteem while artistically expressing themselves as they create original art work. Motor skills and planning will be addressed through cutting, gluing, drawing, and organizing photos into art projects. Students will express themselves creatively and work on increasing independence and organizational skills, while at the same time interacting socially and having fun! There will be many NEW projects this year! Some past activities have included designing personalized decorative cans, rubber stamping cards, and CD-mini-scrapbooks.

Tuesday

5th & MS Cooking Club

Jessica Middlebrook

****UPDATE****

5th grade students are now eligible to enroll in this after-school group!

In this group, students will develop their kitchen and social skills by working together on a cooking project and enjoying the delicious results! Some projects include nachos, smoothies, pizza bagels, and cookies. Staff and students will collaborate to work on measuring, following a recipe, and kitchen safety. Each week students will create a tasty snack, meal, or dessert, and will end the program by creating a beautiful personalized recipe book to take home and share!

EMS Jewelry Making

Sharon Zweig

Activities in this group will focus on helping students develop their fine motor, tactile, visual, and social-pragmatic language skills while creating beautiful jewelry! Students will work on increasing their organizational planning and sequencing skills while making necklaces, bracelets and earrings using a variety of beads and other materials.
